

CRC 1116 *MASTER SWITCHES* IN CARDIAC ISCHEMIA

Junior Research Group Leader:

(E14/E15, 100%)

We are pleased to announce a new **Junior Research Group Leader** position in the field of myocardial infarction with a focus on the early healing phase and interrelationships with co-morbidities. The research focus should complement key research topics of the CRC1116 such as inflammation, metabolism and systems communication. The group will be associated with the Collaborative Research Centre 1116 (CRC 1116). The CRC 1116 aims to support the early career development of highly qualified researchers. The position will enable them to further develop their scientific careers as a leader of an independent junior research group. The funding for the junior research group will be provided by the Medical Faculty of the Heinrich Heine University for four years and is endowed with an additional PhD position plus consumables.

Selection criteria are:

- Excellent PhD thesis
- Approximately 2 years of post-doctoral research experience and maximum of 4 years post PhD
- Strong scientific track record
- Scientific project that complements and/or extends current CRC 1116 projects in acute myocardial infarction and recovery

Applications should include:

- A project proposal of no more than 10 pages (addressing current state of research, research objective and preliminary work, a project-related list of publications, and a research plan, including proposed research methods and intended collaborations within the CRC 1116)
- Curriculum Vitae

Please send your application in one pdf-document to grk-sfb1116@hhu.de.

Application deadline: **31th January, 2019.**

Proposals will be evaluated by external reviewers.
