

Senior Research Scientist position (Oberassistent/in, Maître-Assistante)

A Position of **Senior Research Scientist (Oberassistent/in, Maître-Assistante)** is available at the earliest from **January 1st, 2020** for Integrative Physiology at the Department of Endocrinology, Metabolism and Cardiovascular System (EMC) of University of Fribourg, Switzerland. The position is limited to maximum 5 years. The successful candidate has teaching duties of 4 hours per week for defined chapter(s) in integrative physiology (excluding Neurophysiology) to medical and biomedical students at bachelor levels either in French and/or German.

Candidates with a PhD and/or MD degree and solid training/expertise in cell biology, biochemistry, molecular biology and *in vivo* animal models and/or human research, who worked as postdoc for more than three years in the research field of cardiovascular research and/or metabolic diseases are encouraged to apply. The candidate is expected to apply for extramural funding within the first two years and progressively develop his/her independent research project.

Please send your application (by post or email), including a cover letter explaining your motivation, CV, copy of degree/diploma certificates, a brief statement on previous research experience, and contact details for at least two referees till **September 20, 2019** to:

Prof. Zhihong Yang, MD
Professor of Integrative Physiology
Department of EMC
